ANDY (DIXUAN) WANG

(626) 420 7568 | andy.dxwang@gmail.com | linkedin.com/in/di-xuan-wang/ | github.com/DiAndyW | Cat Lover

EDUCATION

University of California, Los Angeles Expected Graduation: Dec 2027
Bachelor of Science, Computer Science *GPA: 3.7/4.0*
Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networking, Web Development, Machine Learning
Activities: CS32 (Data Structures & Algorithms) Learning Assistant, ACM TeachLA, Game Music Ensemble

EXPERIENCE

Microsoft Jun 2026 - Sep 2026
Software Engineering Intern *Redmond, WA*

- Built an AI-assisted **Kubernetes** security posture platform that transforms security scan findings into actionable risk assessments and remediation guidance, helping users identify security issues in **offline** environments
- Reduced ungrounded AI-generated security guidance by **91**% through model evaluation on **Microsoft Foundry** and architecture redesign, improving the reliability of automated security analysis
- Developed a modular **Go**-based security evaluation CLI with scanner orchestration and artifact management to automate **Kubernetes** and **Linux** security posture assessments
- Authored the architecture and implementation plan for a new security evaluation capability, utilizing design reviews and incorporating cross-team feedback around security, scalability, and AI integration

UCLA Department of Civil Engineering Jun 2025 - Present
Software Developer *Los Angeles, CA*

- Built a weather-tracking platform enabling farmers to optimize irrigation through automated field analysis and forecasting crop water demand, providing future irrigation recommendations
- Utilized **Google Earth Engine** to predict soil and crop information, reducing manual data entry time by **30%**
- Created a responsive, cross-platform interface with **React Native**, **Leaflet.js** and **Google Maps API**
- Architected a **FastAPI** backend using **Supabase** as a lookup table for chunked parcel data stored in **Cloudflare R2**, used **Firebase** for user authentication, and implemented query caching, improving retrieval speeds by **60%**

Clubhouse Bruins Mar 2025 - Present
Lead Fullstack Developer 🔗 *Los Angeles, CA*

- Built a website using **Next.js** and **Vercel**, helping students review and discover clubs, serving **500+** monthly users
- Built dynamic API routes and optimized query logic to **Supabase**, reducing page loading times by **50%**
- Led a team of **8** developers to develop new website features, conducting weekly meetings to delegate tasks, troubleshoot blockers, coordinated with the design team on UI implementation, and oversaw **CI/CD** pipeline integration

PROJECTS

Mosaic | *Swift, SwiftUI, TypeScript, Express.js, Python, FastAPI, Supabase*

- Designed, built, and shipped a native **SwiftUI** iOS app where friend groups take on weekly photo challenges that contribute to a shared photo mosaic
- Built an **Express** REST API backed by **Supabase**, handling authentication, request validation, and per-group tenant isolation while powering the weekly challenge flow, social feed, and push notifications
- Designed a **FastAPI** image-processing microservice, orchestrated by the **Express** backend, that builds the photo-mosaic by partitioning target images into tiles and matching photos using visual similarity metrics

True Talent | *React, Node.js, Python, Flask | LAHacks 2025* 🔗

- Created a code-interview website that helps detect cheating using AI, allowing companies to find the truly talented
- Made a responsive website using **React**, **Node.js**, and **WebSockets**, allowing for real time interviews
- Used **Google Gemini** to analyze multimodal data for potential cheating, generating feedback and follow-ups

SKILLS

Languages: JavaScript, TypeScript, Python, Go, Java, C++, Swift, HTML/CSS, Shell
Frameworks & Technologies: React, React Native, Next.js, Spring Boot, FastAPI, Express.js, Node.js, Cobra, Three.js
Databases & Cloud: PostgreSQL, MongoDB, Firebase, Supabase, Cloudflare R2, Azure, Vercel
Tools: Git, Docker, Kubernetes, Linux, Claude Code, Codex, Copilot
